Director of Research Wanted

A Boulder Innovation Center Client, **Tusaar**, is growing and adding a Director of Research. The role will direct all laboratory operations and conduct experiments for the development and testing of proprietary media. This includes but is not limited to: ingredient selection, chemical processing, product testing and certification, QA/QC, documentation, record keeping, data analysis, data presentation and problem solving.

The company is commercializing University of Colorado technology to develop a novel system for immobilizing heavy metals in water discharges.

Some of the Requirements for the Position;

- Doctoral or Masters Degree in Chemistry or Environmental Engineering
- 4+ years of relevant experience industry
- Demonstrated successful managerial and supervisory experience
- Proficient in Microsoft Office, Word, Excel and PowerPoint

Successful candidates must have a detailed understanding of water treatment especially using Granular Activated Carbons (GAC), Ion Exchange and other media filtration processes. Exposure to organics and metals in water is also a must. This position requires the candidates to have strong laboratory management and organizational skills. Candidates must have the ability to work independently with minimal supervision and have strong trouble-shooting and problem solving skills. Candidates should be familiar with scaling up from laboratory levels to larger batch production of media and have experience with the design and operation of pilot projects. Experience with SBIR proposal writing is a significant advantage.

Salary will be based on qualification and experience.

If you are interested and qualified or know someone who is, please send a resume to Gautam Khanna, CEO of Tusaar, gck@tusaar.com.

Sincerely,
Eric Gricus
