The Boulder Innovation Center and eSpace are working together to help local, early stage aerospace companies. [More...](#)

Clean Energy Alliance Clients

The Boulder Innovation Center is working with 2 companies based on the Center's relationship with the DOE funded [Clean Energy Alliance](#).

[Eagle Harbor Technologies](#) has developed an IGBT (Insulated Gate Bipolar Transistor) high efficiency pulsed power supply capable of >3kV and >1kA with improved efficiency (90% à 97%) ready to be commercialized.

[Atmospheric Observing Systems](#) has developed a low cost sensing instrument that can be used for real time atmospheric measurement of CO2.

For more information, please contact Tim@BoulderInnovationCenter.com.

Federal Reserve Bank Values BIC Approach

The [Federal Reserve Bank of Atlanta](#) (FRB-Atlanta) holds focus groups on topics they deem vital to the national economy. The Federal Reserve Bank of Atlanta wanted to know more about entrepreneurial businesses and start-up companies in the current environment. A crucial part of this research was discussion with individuals who interact with high potential start-ups and as a result are familiar with the barriers, opportunities and challenges faced by these businesses.

The bank's research staff identified the Boulder Innovation Center as one of the top incubation centers in the country and invited Tim Bour, Executive Director to participate in a panel discussion regarding entrepreneurial businesses and their impact on innovation, job growth and the economy. The panel discussion included seven incubators and members of the FRB-Atlanta staff including Dennis Lockhart, the Bank's President. The majority of the discussion centered around job growth, how economic policy impacts early stage companies and how the FRB-Atlanta could pro-actively support entrepreneurs.

SSTI Invites BIC to Present at National Conference

The Boulder Innovation Center will be one of the speakers at the 15th Annual SSTI National Conference. The Boulder Innovation

Center will be showcasing our model commercializing university research in a session titled "Accelerating the Commercialization of Research". SSTI is a national organization aimed at improving government-industry economic growth programs dealing with the application of science and technology. [SSTI's Website](#)
